# CREATING A CRYPTO WALLET

If you want to deposit crypto into an online casino, the first step is to register at a registration link.

Create a user account or log in with your Google account.

## Let's get you verified

Select your residency and follow the steps

### Residence

 Hungary (Magyarország)

Complete the following steps to verify your account in **7 minutes**

Personal information

Government-issued ID

Liveness check

# IDENTIFY YOURSELF

After providing some personal information, a photo of your ID card, and webcam or phone camera identification — and answering a few questions — it takes about 10 minutes, and you can start using your crypto wallet.

1.

2.

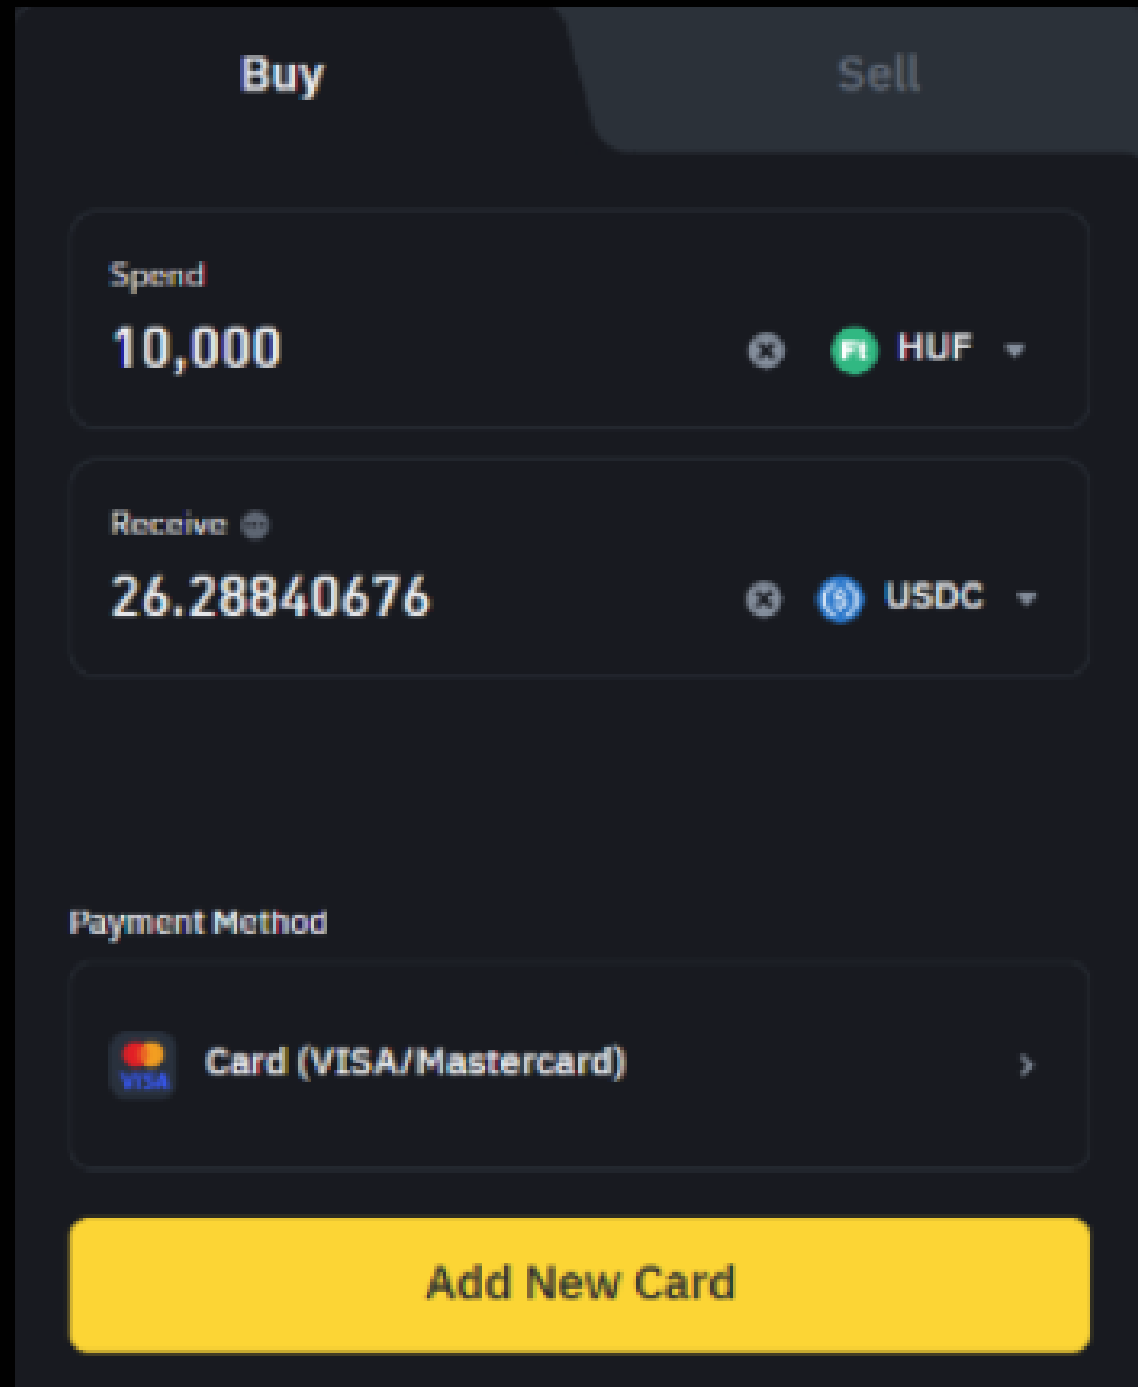

## BUYING CRYPTOCURRENCY WITH A CARD

After providing some personal information, a photo of your ID card, and webcam or phone camera identification — and answering a few questions — it takes about 10 minutes, and you can start using your crypto wallet.

## BUY WITH A CARD

Enter the amount you want to spend on crypto, then select which cryptocurrency you want to buy.

Next, add your bank card, pay, and you're done —the cryptocurrency will appear in your account within a few minutes.

Buy Sell

Spend  
10,000   HUF ▾

Receive   
26.28840676   USDC ▾

Payment Method

 Card (VISA/Mastercard) >

Add New Card

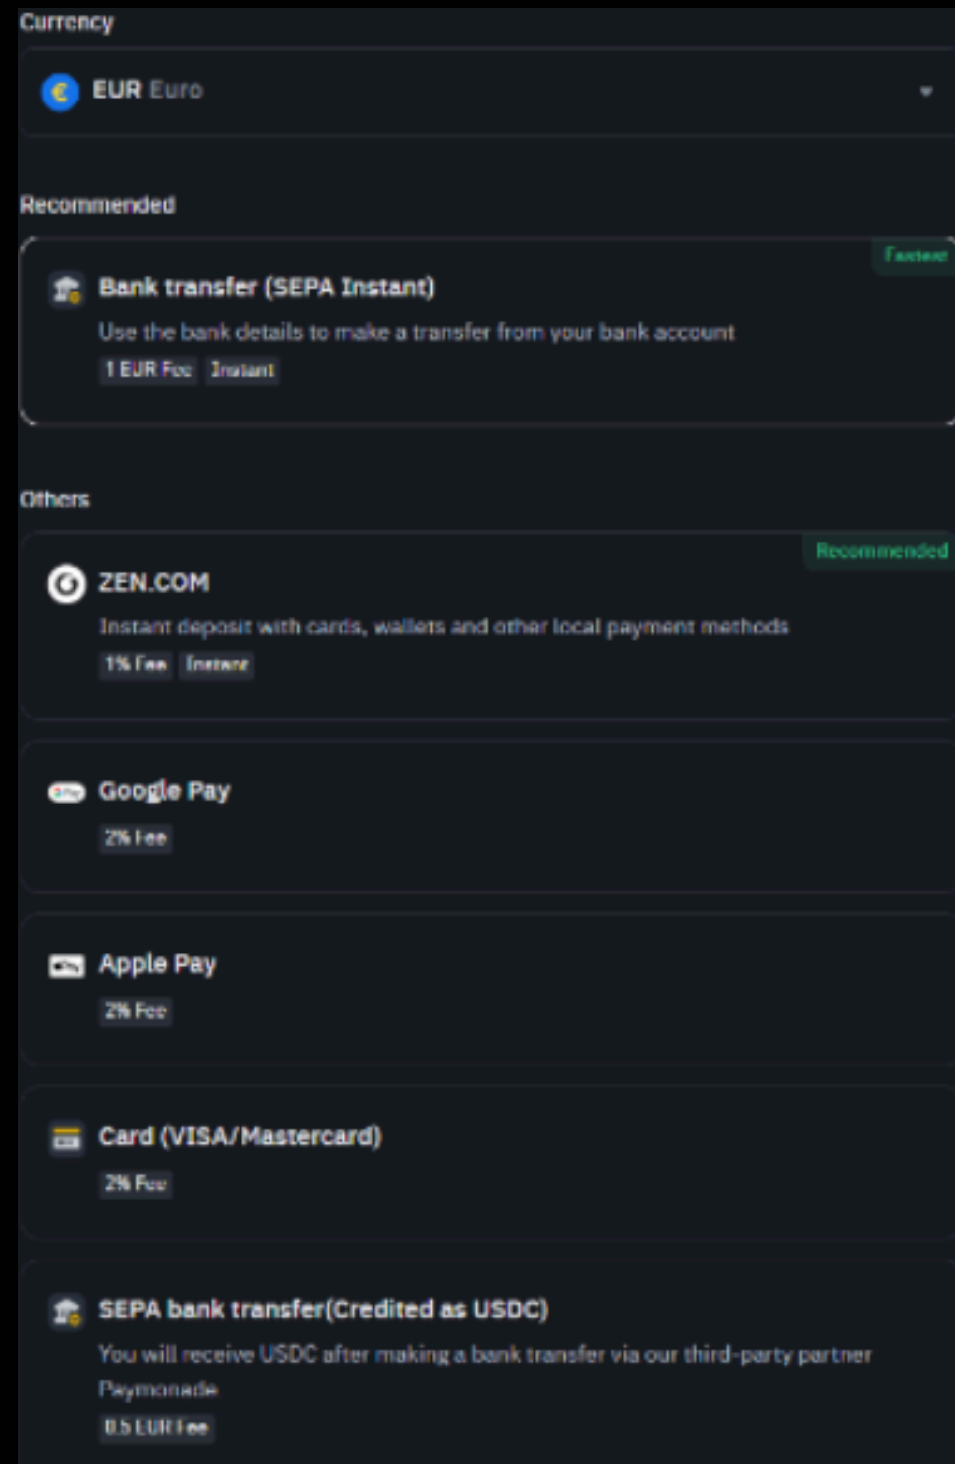

## WHAT SHOULD I CONVERT MY MONEY INTO?

We primarily recommend stablecoins. These are cryptocurrencies whose exchange rate is fixed — 24 hours a day, one USDC or one USDT is worth one dollar. On Binance, USDT is currently unavailable, so we recommend LTC (Litecoin) or USDC.

The transaction cost for transferring LTC is almost

Spend	10,000	FX Ft HUF
Receive	0.3285858	FX LTC
Spend	10,000	FX Ft HUF
Receive	26.28840676	FX USDC

# PURCHASE BY BANK TRANSFER

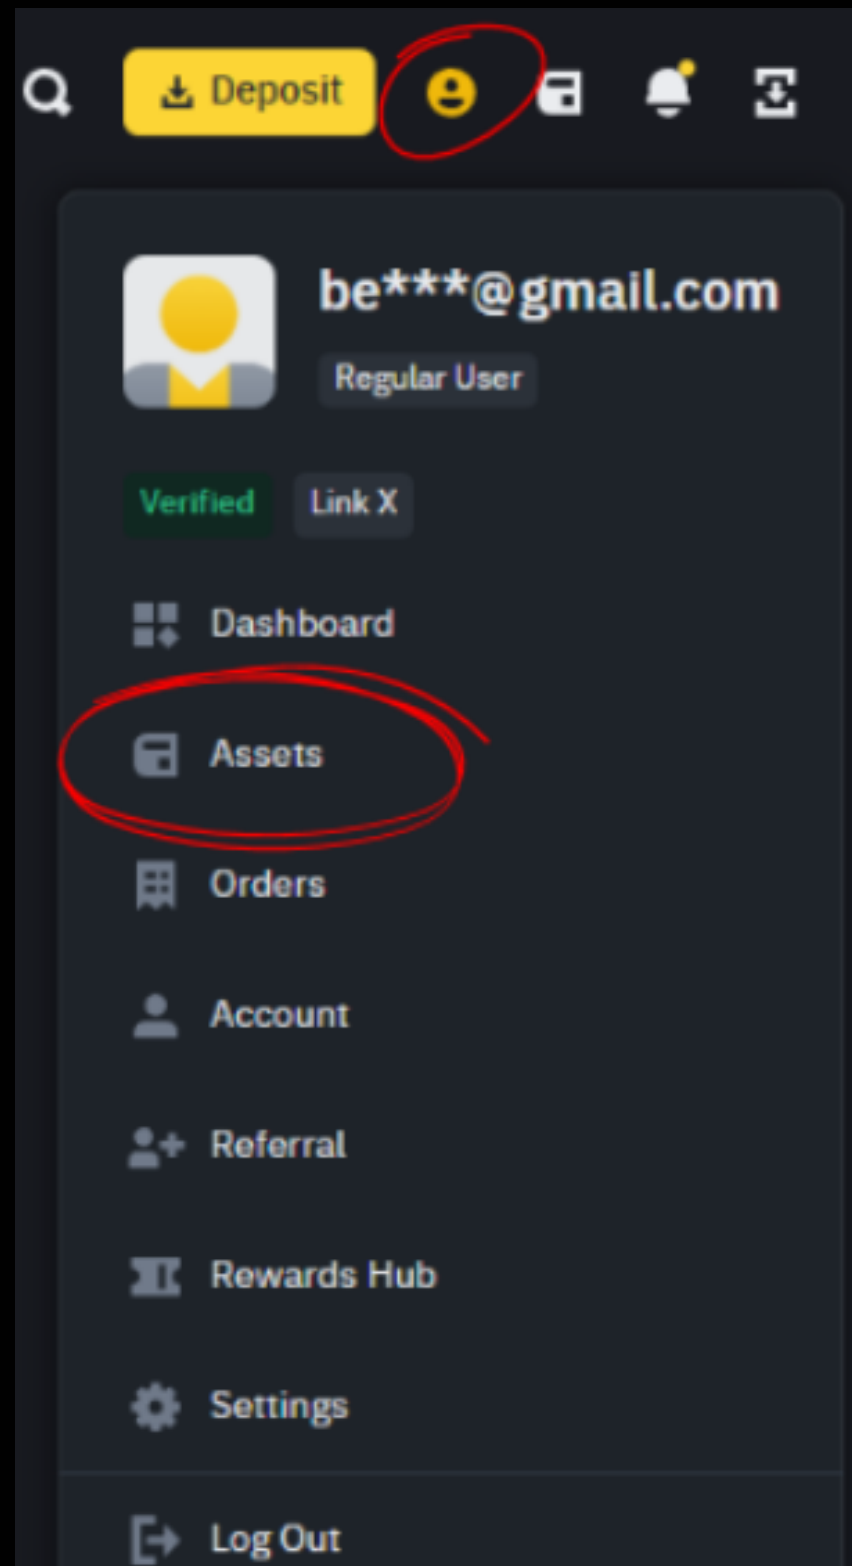

If you do not want to provide your credit card details, you can also top up your crypto wallet by bank transfer.

Unfortunately, this is not available in HUF, only in EUR.

After entering the amount, you will receive a bank account number to which you can transfer the amount you wish to top up

.

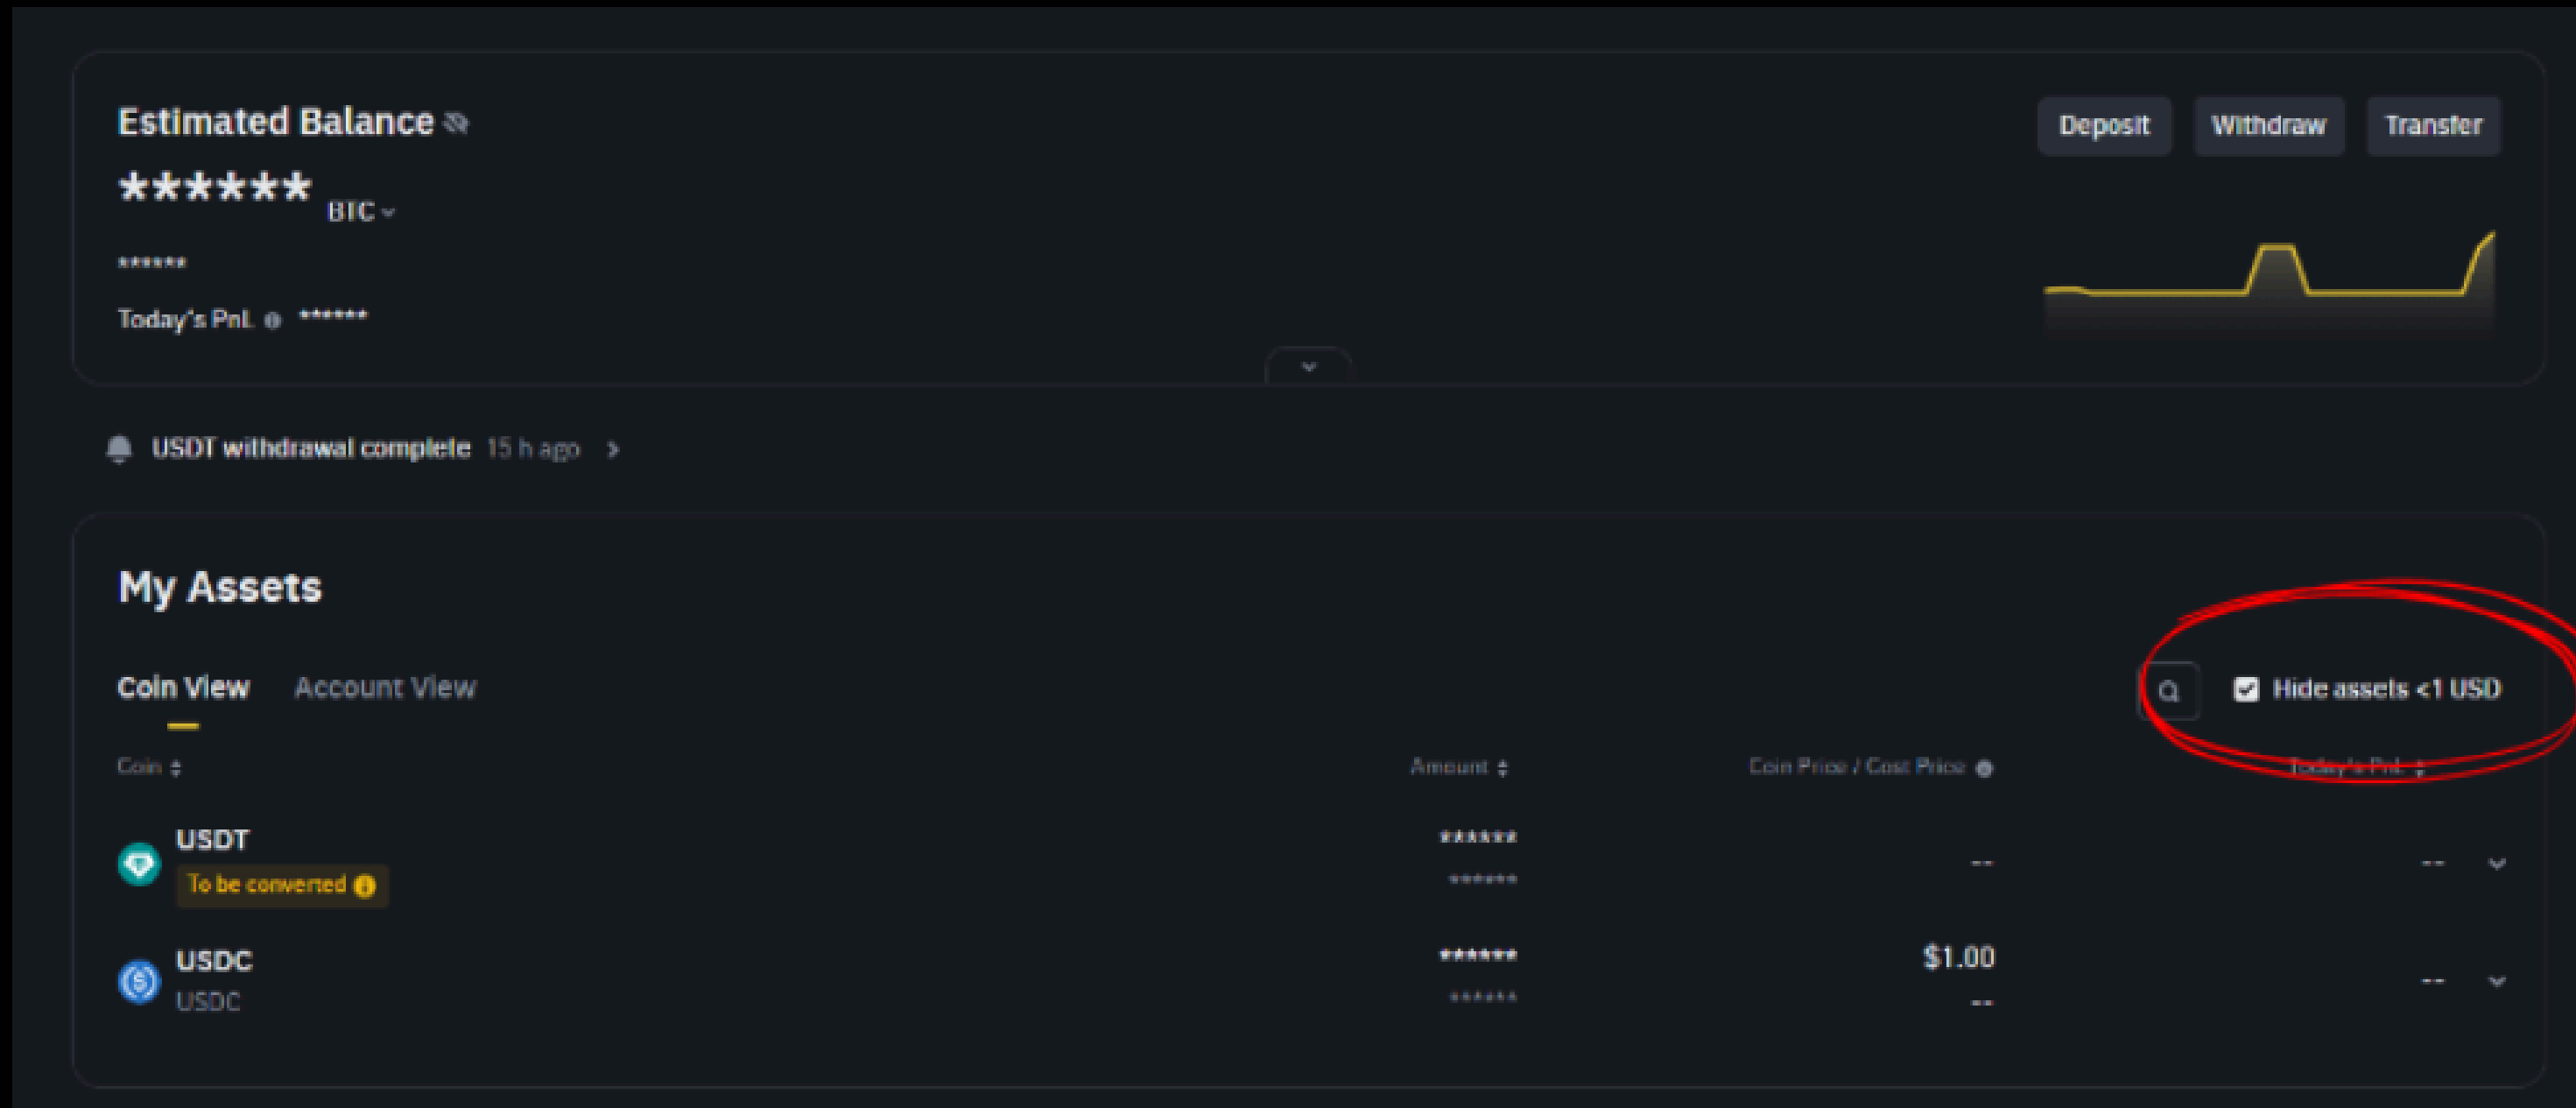

# CRYPTOWALLET

In the upper right corner, click on the little man icon,  
then on the "Assets" button. Here you will find the  
cryptocurrency you purchased or the EUR you  
deposited,  
which you can convert to crypto

# ACCOUNT BALANCE

Here you can see your account balance. We recommend that you enable the "Hide assets USD" option — this way you will only see crypto wallets that have at least 1 USD, and thousands of empty wallets will not be displayed

## CASINO DEPOSIT WITH CRYPTOCURRENCY

Start the deposit process at the casino just as you would if you were paying with a credit card.

Then select cryptocurrency deposit, and within that, the currency you are using. If you followed the instructions, you should now have LTC in your crypto wallet — select this.

## SELECTING THE APPROPRIATE NETWORK

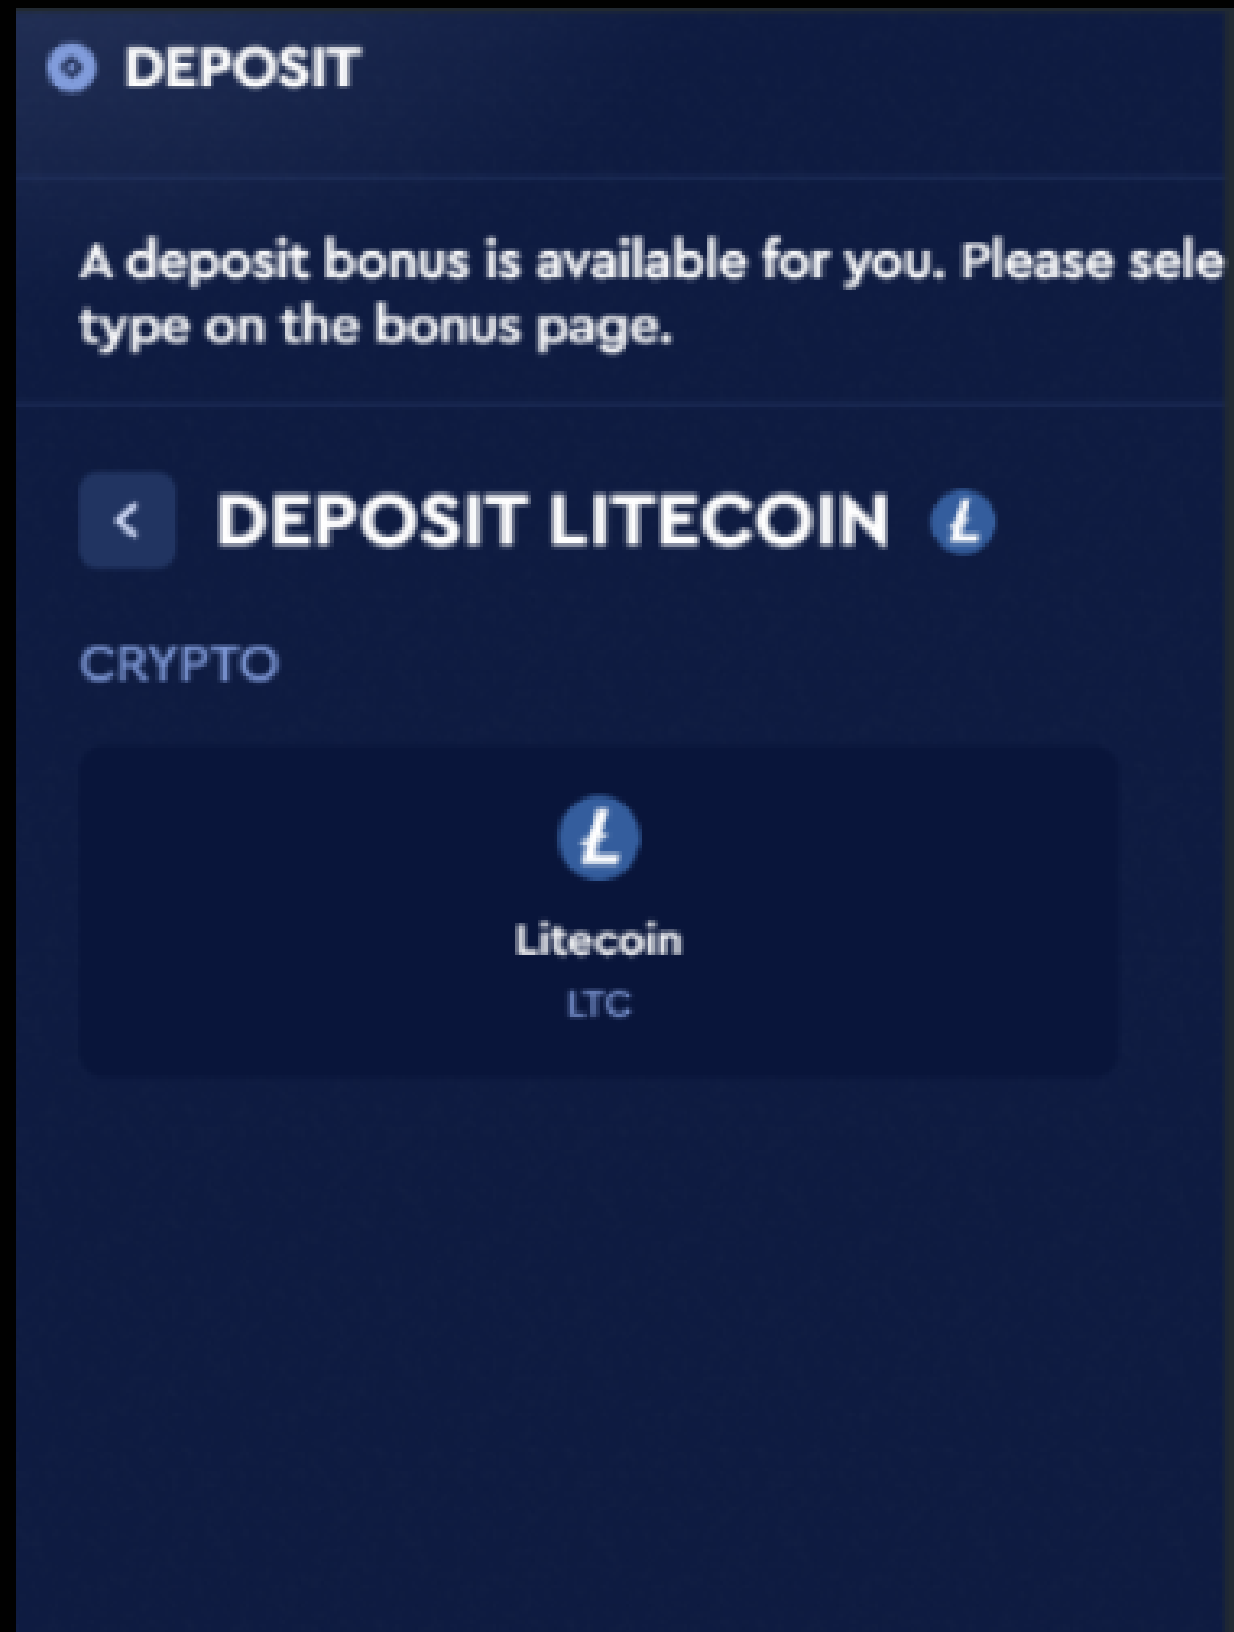

In the case of cryptocurrencies, there are several networks available for the same cryptocurrency.

It is important that the sender and recipient use the same network

It is important that the sender and recipient use the same network.

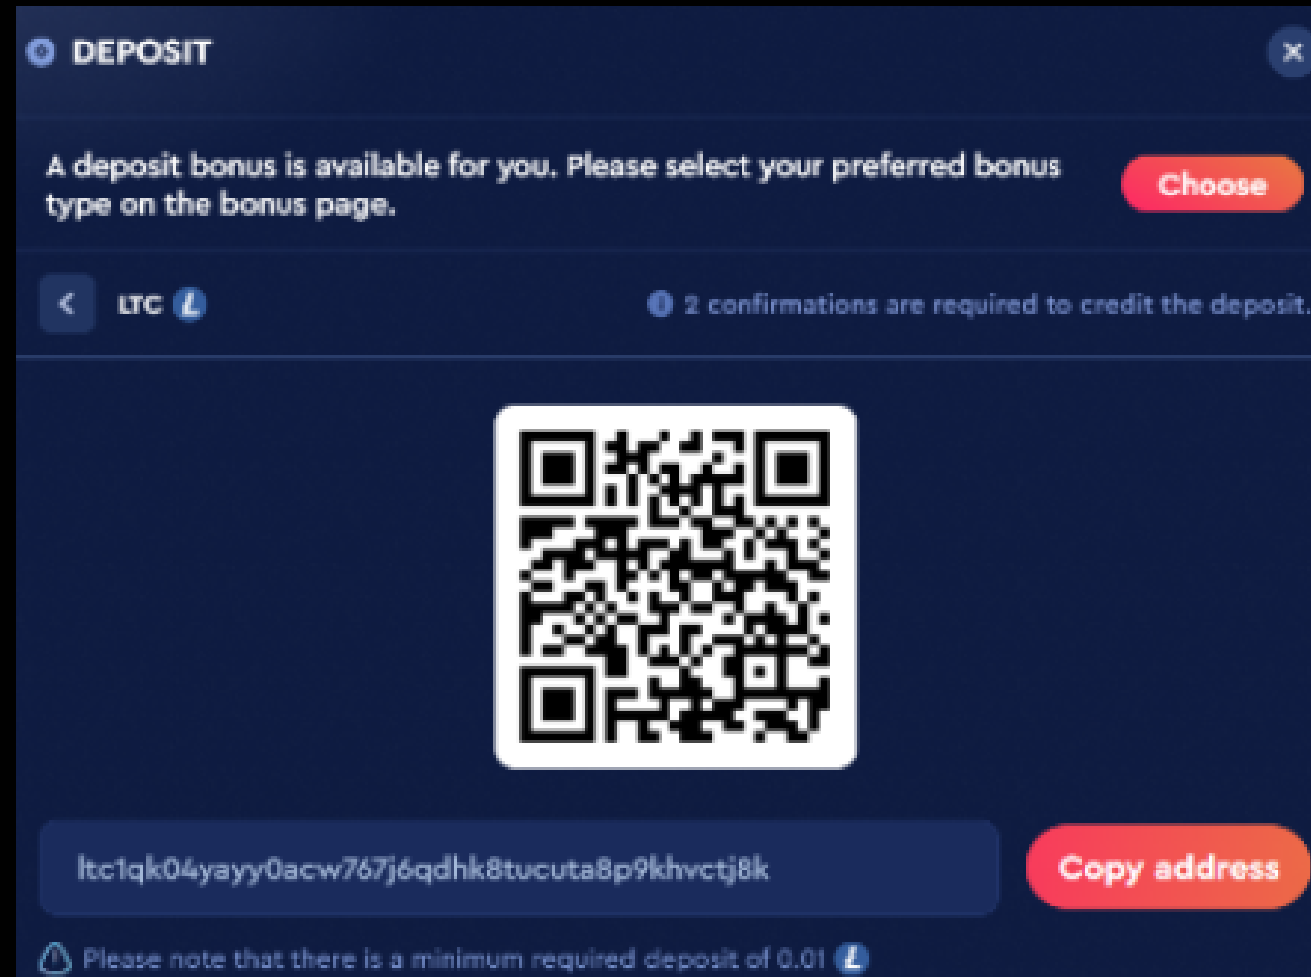

For example, if you want to make a deposit or withdrawal on the LTC network, you must select this network on both sides — the sender and the recipient.

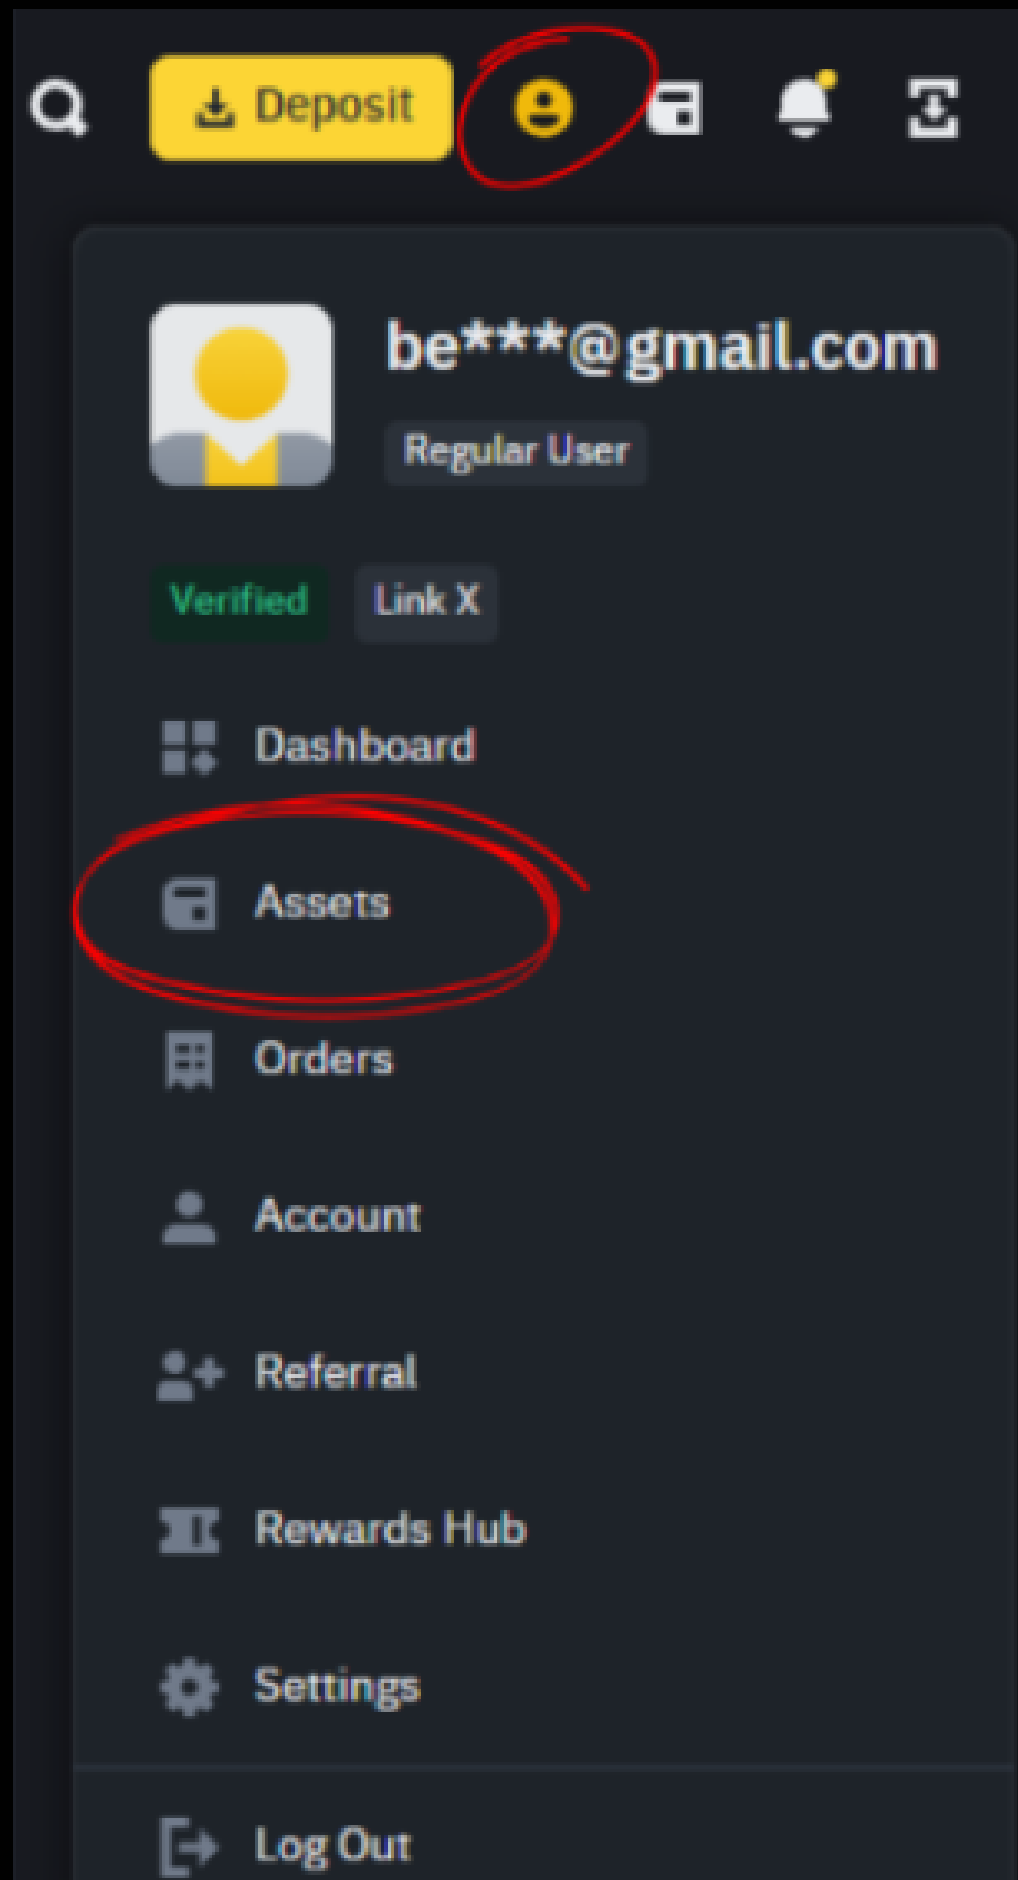

In this case, we want to transfer LTC on the LTC network.

## CASINO DEPOSIT (LTC)

If you are going to use LTC for deposits and withdrawals, it will be easy for you, as there is only one network option here. Always choose this option! Copy the address from the casino, and send your LTC here.

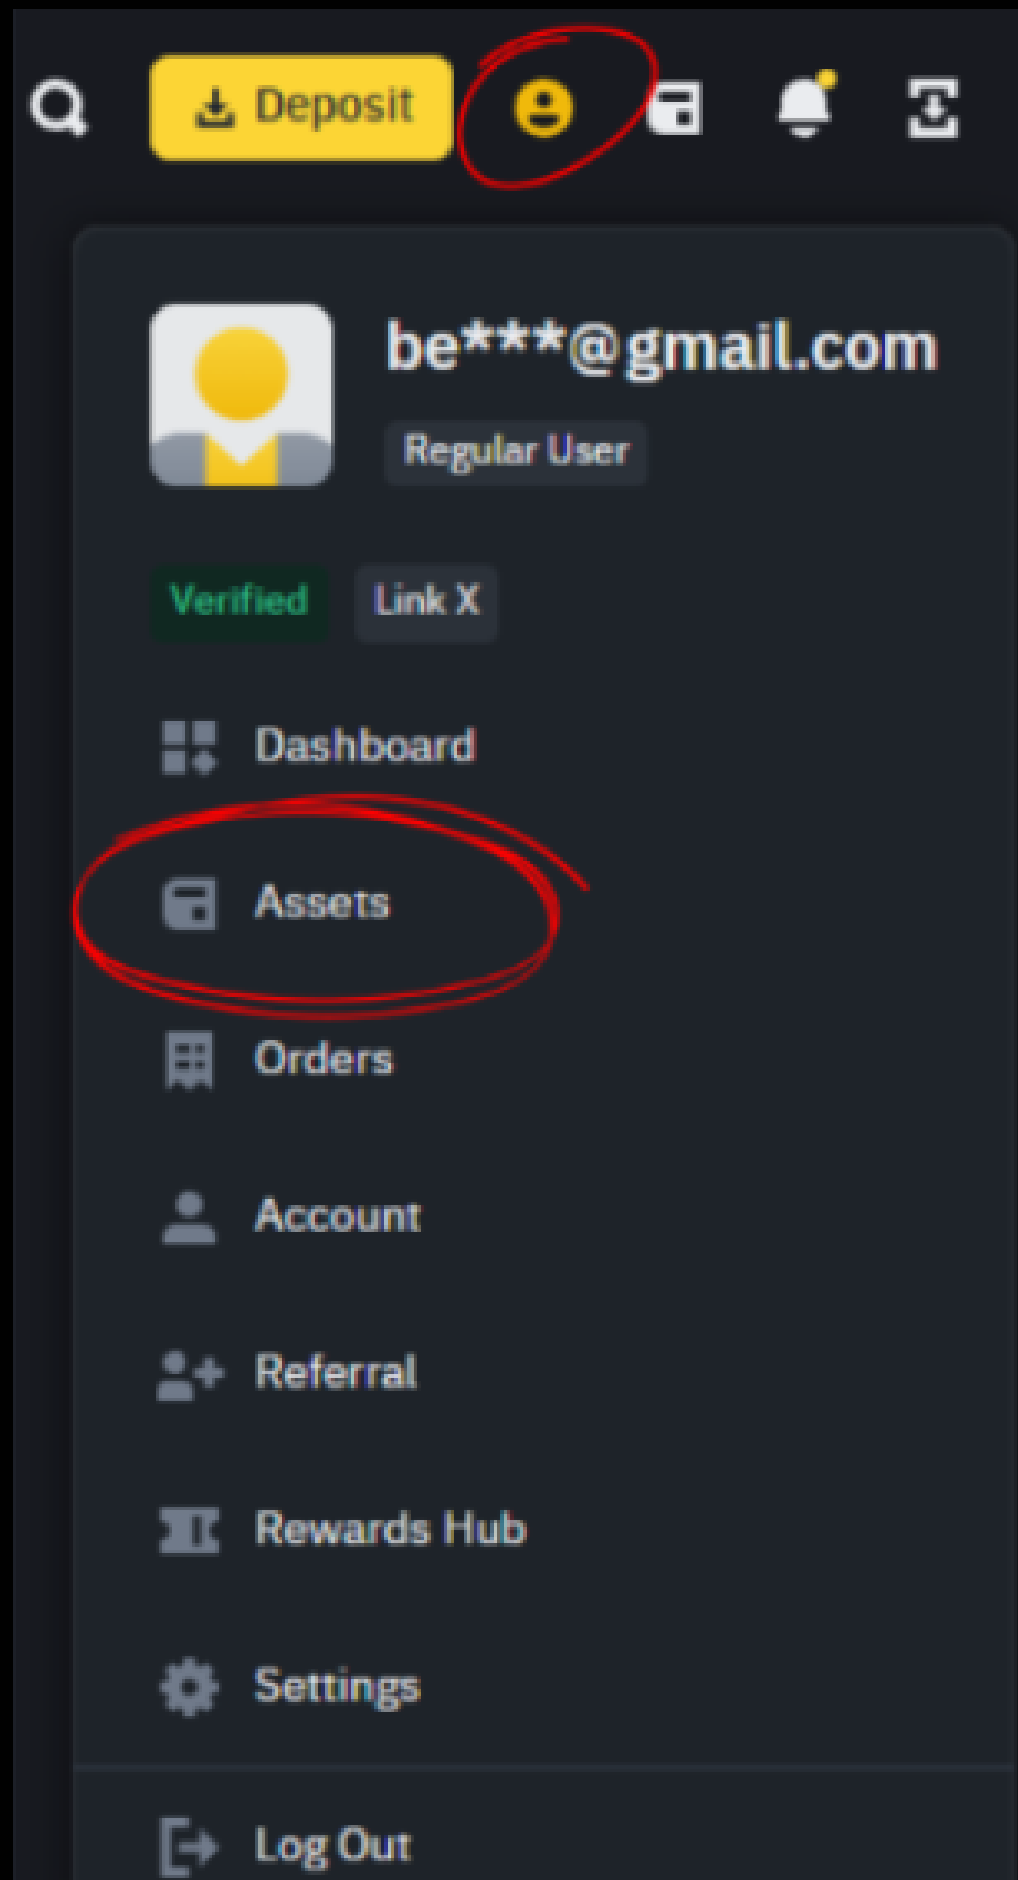

## CASINO DEPOSIT (LTC)

Go back to your Binance crypto wallet. Click on the 'Assets' button in the top right corner, then select 'Withdraw'.

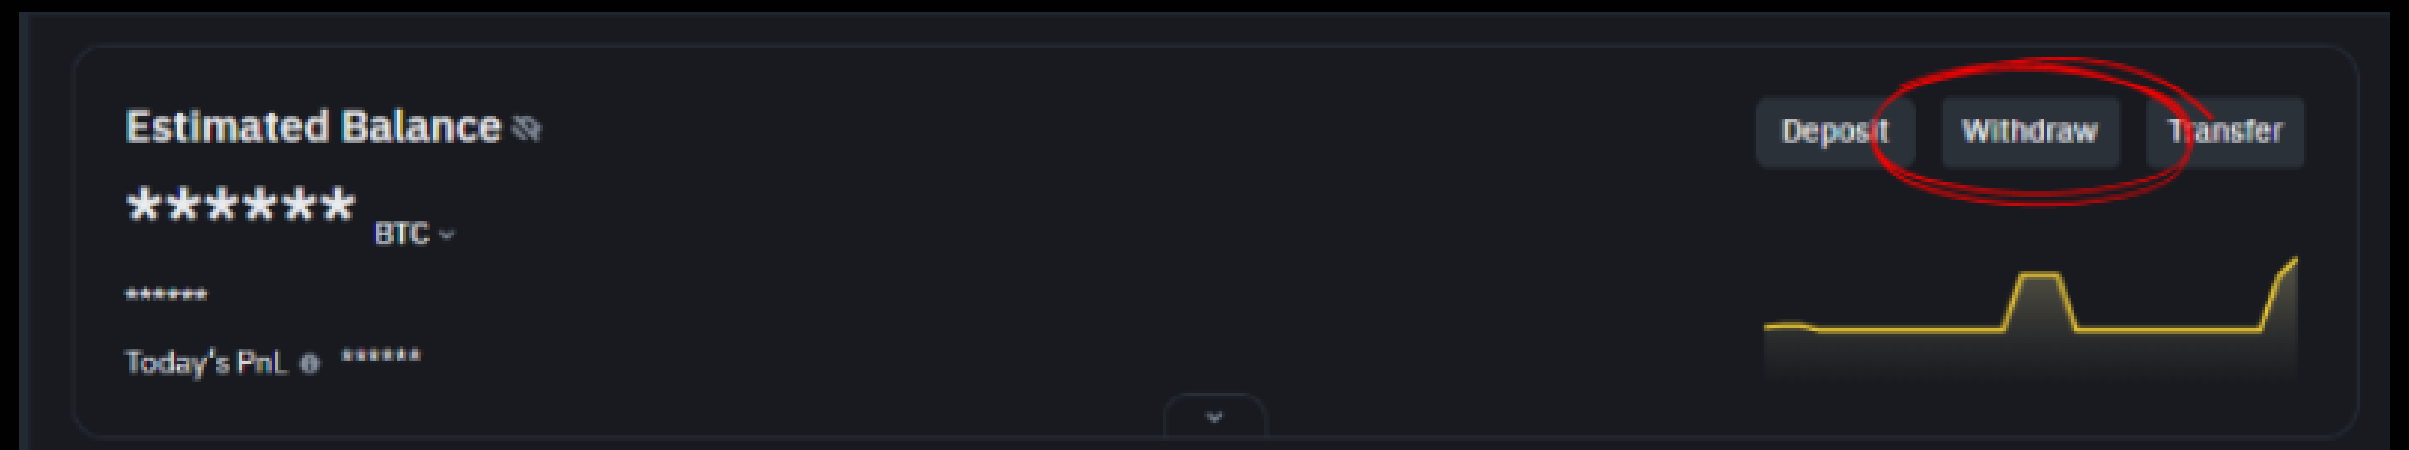

Select the cryptocurrency you want to withdraw (LTC), then enter the withdrawal amount.

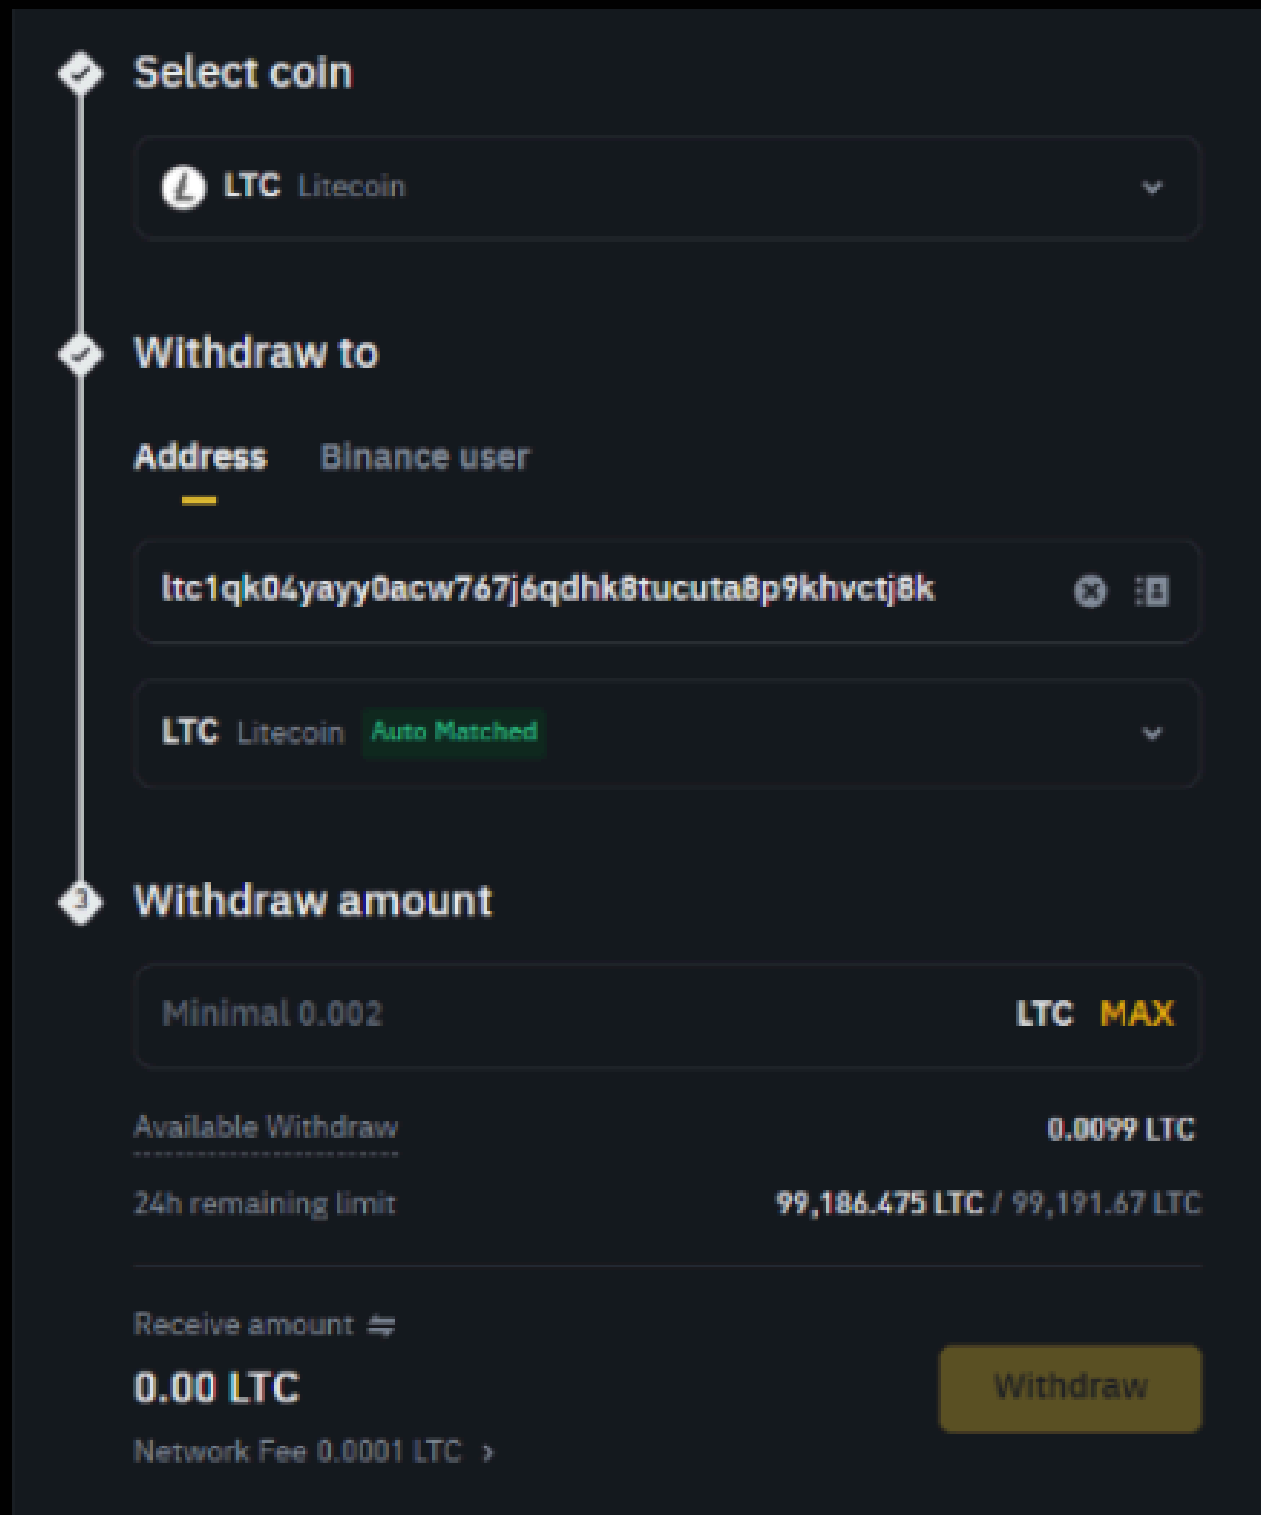

## CASINO DEPOSIT (LTC)

Go back to your Binance crypto wallet. Click on the 'Assets' button in the top right corner, then select 'Withdraw'.

Select the cryptocurrency you want to withdraw (LTC), then enter the withdrawal amount.

## CASINO DEPOSIT (LTC)

Select LTC in the "Coin" field.

Paste the address you copied from the casino website into the "Enter Address" field.

Since you want to deposit with LTC, select the LTC

Since we want to deposit with LTC, select the LTC

network. In the case of Binance, this usually happens automatically, but it is worth paying attention to it.

Then enter the amount you want to deposit and confirm the transaction with the "Withdraw" button.

## Security Verification Requirements

You need to complete all of the following verifications to continue.

0 / 2

 Authenticator App →

 Email →

[Security verification unavailable?](#)

 Protected by Binance Risk

## APPROVING THE TRANSACTION

After confirming the transaction, you must also approve it.

You will receive a 6-digit code by email, which you must enter to approve the transaction.

We recommend that you also set up two-factor authentication — we recommend Google Authenticator for this.

This way, you have to confirm transactions twice, which provides extra security and helps you verify that you are sending the amount to the right place.

## LET THE GAME BEGIN

If you have followed the instructions correctly, the amount you sent

will appear in your account within 3-5 minutes.

If you have completed a successful session, the payment process

is the same, only in reverse order:

1. Log in to your crypto wallet and go to Deposit
2. Select the L TC option — your wallet address will appear here,  
which you should copy.
3. Then, on the casino interface, select Withdraw and enter your wallet address.

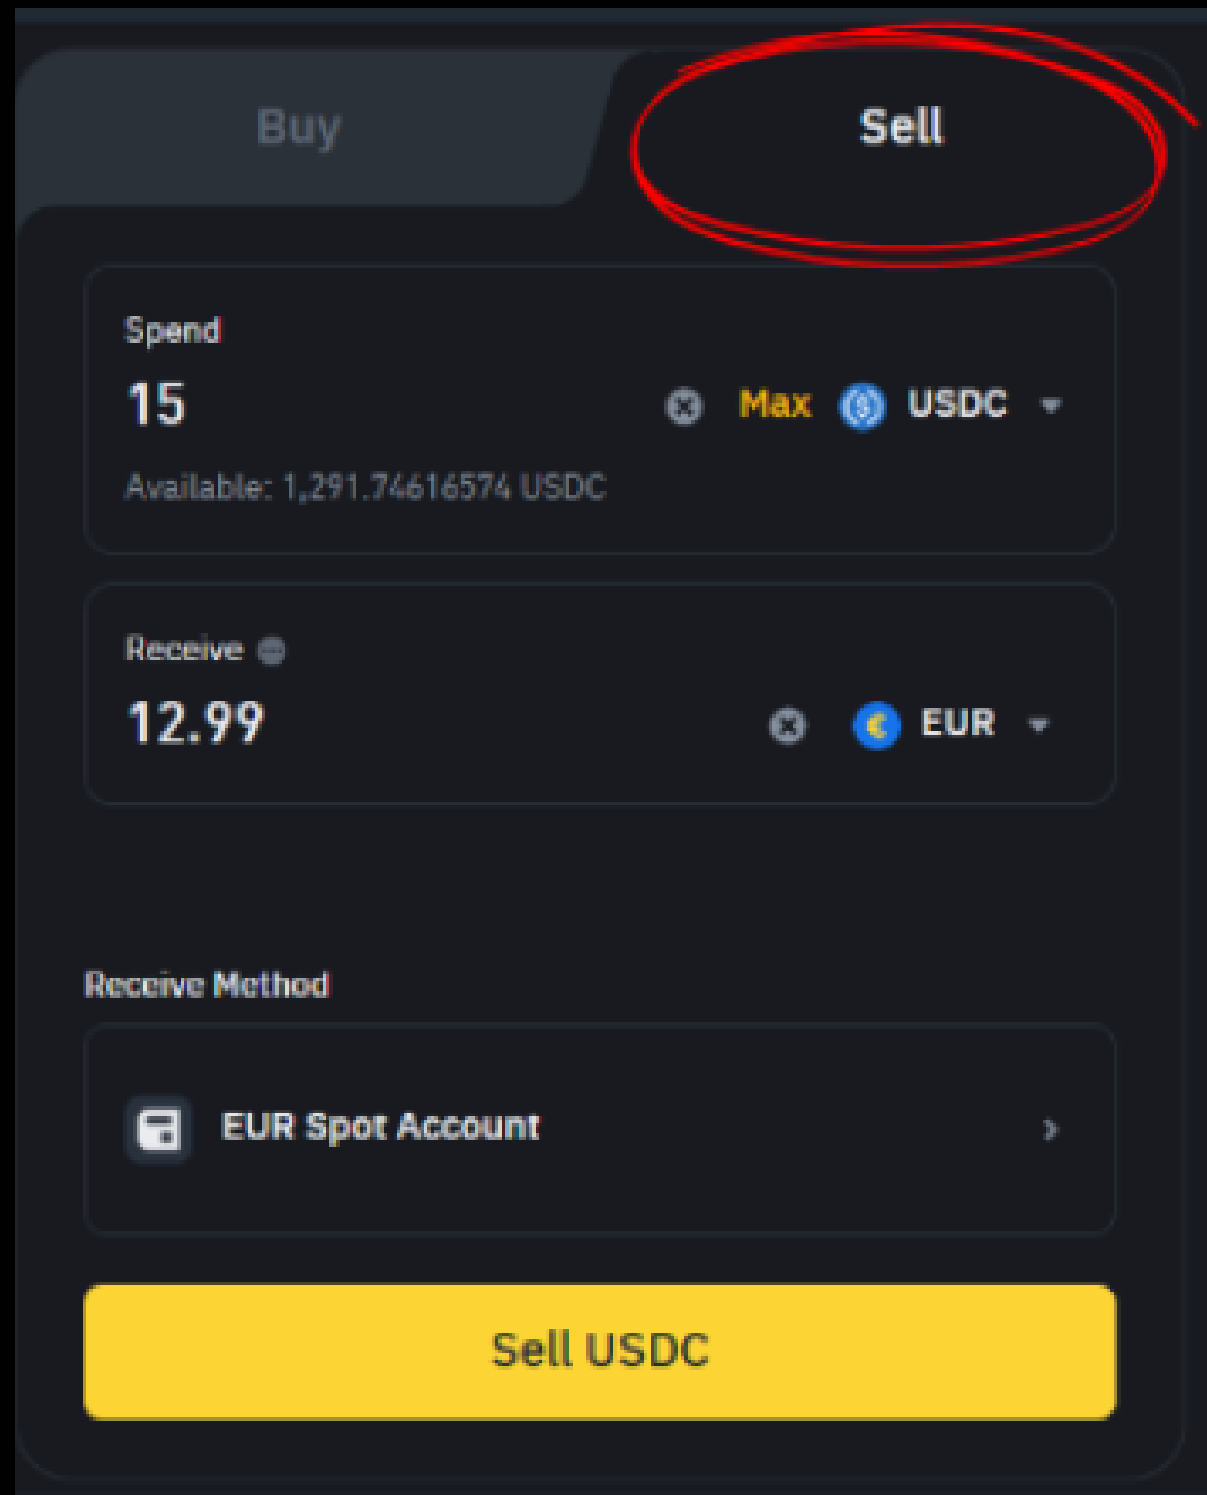

## SELLING CRYPTOCURRENCY

Now, instead of clicking on the "Buy" button, click on the "Sell" button (see page 5).

After the sale is complete, click on the "Assets" button (see page 5).

Once the sale is complete, click on the "Assets" button (see page 8).

If you see the amount here, you have done everything correctly. 3. Next, select the Withdraw option on the casino interface and enter your wallet address.

The screenshot shows a trading interface with two tabs: "Buy" and "Sell". The "Sell" tab is highlighted with a red oval. Below the tabs, there are two input fields. The first is labeled "Spend" and contains the value "15". To its right, there are icons for "Max" and "USDC". Below this field, it says "Available: 1,291.74616574 USDC". The second input field is labeled "Receive" and contains the value "12.99". To its right, there are icons for "EUR". Below this field, there is a "Receive Method" section with a button labeled "EUR Spot Account". At the bottom of the interface, there is a large yellow button labeled "Sell USDC".
